Software Engineer

emika.suntisumranwilai@gmail.com | +1 604 782 9592 | Vancouver, BC | LinkedIn | GitHub | Personal Web

## SUMMARY

An aspiring software engineer with a strong foundation in business and the blockchain industry, I am deeply passionate about building technology that solves challenging problems and creates value for end users. My extensive work experience in operations, data analysis, product development, and business development provide me with valuable perspectives, makes me product-oriented, and equips me with the skills necessary for working on tasks and designing the best user experience.

## SKILLS

**Languages:** HTML, CSS, JavaScript, SCSS, Python, SQL, R, TypeScript

**Frameworks, libraries, and environments:** NodeJs, ReactJs, Express, Bootstrap, Tailwind, Pandas, Numpy, JQuery, Matplotlib, Styled Components, SCSS, EmailJs, GlideJs, GSAP, Angular

**Databases:** mySQL, MongoDB, Google Spreadsheet, Amazon RDS

## WORK EXPERIENCE

**Product Lead** at *MUZA NFT Solutions* | Jan – July 2023

- Spearheaded extensive product research in the web3 landscape, generating potential product portfolios and prototypes using Figma for client validation and testing before development.
- Devised and executed a comprehensive product communication plan and materials for MUZA.
- Collaborated with developers to develop NFT wallet and features using Agile.

**Operation Manager** at *Knowhere NFT Marketplace* | Jan – Sep 2022

- Provided direct support to the CEO and CPO, collaborating with developers to optimize daily operations.
- Served as both Developer Relations and Customer Success to help onboarding clients, solve bugs, and created tickets for developers for major issues reported.

## PROJECTS

### Design Challenges

A platform for school and college students seeking side projects to connect with small business owners to discover ideas and opportunities to work with real clients.

**Tech stack:** HTML, CSS, SCSS, JavaScript, Zapier, APIs, EmailJS, Spreadsheet, Figma, Netlify

### Weather Mate (Link)

A website where users can check the weather and news by searching for a city name. Users can also save the city for future visits.

**Tech stack:** HTML, CSS, SCSS, JavaScript, APIs, Figma, Netlify

### Color Ideas (Link)

A go-to website for any web developers who need clearer ideas on what color pairs they should use for their projects. Users can try various combinations of over 140 CSS colors or choose to use HEX colors.

**Tech stack:** HTML, CSS, SCSS, JavaScript, APIs, Figma, Netlify

## EDUCATION

**Web and Mobile App Development Diploma**

August 2023 - Present

Cornerstone College, Vancouver, BC

**Finance and Entrepreneurship**

May 2022

UBC Sauder School of Business, Vancouver, BC

**Entrepreneurship Initiative Program**

July 2021

National University of Singapore, Singapore

**Bachelor of Finance and Business Administration**

May 2021

Chulalongkorn University
