EMIKA SUNTISUMRANWILAI   Frontend Developer

emika.suntisumranwilai@gmail.com| +1 604 782 9592 | Vancouver, BC | LinkedIn | GitHub | Personal Web

SUMMARY

A frontend developer with a background in finance and blockchain industry. I am deeply passionate about building technology that solve challenging problems and create value for end users. My extensive experience in operation, data analysis, product development, and business development provide me valuable perspectives and skills necessary when working on frontend tasks and designing best user experience.

SKILLS

Languages: HTML, CSS, JavaScript, CSS, Python, SQL
Frameworks, libraries, and environments: NodeJs, ReactJs, Express, Bootstrap, Tailwind, Pandas, Numpy, JQuery, Matplotlip, Styled Components, SCSS
Databases: mySQL, MongoDB, Google Spreadsheet, Amazon RDS

WORK EXPERIENCE

Product Lead at *MUZA NFT Solutions* | Jan – July 2023
- Pioneered extensive product research in the dynamic NFT and web3 landscape, identifying innovative concepts adaptable to corporate CRM systems. Generated a potential product portfolio and crafted a prototype using Figma for client validation then forwarded to developers.
- Strategized and executed comprehensive product communication initiatives across the new website, client presentations, and all marketing and sales collateral to convey value propositions effectively.
- Led proactive project scouting efforts, identifying compelling collaboration opportunities for MUZA. Developed tailored pitch decks featuring in-depth analyses and customized solutions for each prospective partnership.

Operation Manager at *Knowhere NFT Marketplace* | Jan – Sep 2022
- Directly supported the CEO, CPO and coordinated with developers to streamline daily operations and solve technical bugs for an NFT marketplace.
- Monitored how daily business was running, collected feedback from users on Twitter and Discord, tested for bugs and reported back to the team for process and product improvement.
- Contacted and communicated with domestic and international NFT talents and projects to form partnerships and facilitate the launch of over 100 NFT projects and maintained strong relationships with ecosystem partners on Terra Blockchain.

PROJECTS

Design Challenges
A platform for school and college students seeking side projects to connect with small business owners to discover the ideas and opportunities to work with real clients.
Tech stack: HTML, CSS, SCSS, JavaScript, SCSS, Zapier, APIs, EmailJS
